|

 EU Citizen (EE)

Full-stack developer with 4+ years of experience building fully interactive, responsive, and scalable web applications. With proven experience in cross-functional international teams through clear technical communication and collaborative problem-solving. Adept at integrating modern AI/LLM tools into the development lifecycle to accelerate code delivery, automate documentation, and optimize architectural planning.

PROFESSIONAL EXPERIENCE

Research Fellow - Fullstack Web Developer

University of Leipzig - Humankind

Apr. 2025 – May 2026

Leipzig, Germany

- Contributed to the design and implementation of an educational platform using a Turbo monorepo (React 19/Next.js) and a PostgreSQL database with Drizzle ORM, managing the entire lifecycle from database schema to Docker-based deployment.
- Helped to establish the project's AI-assisted development framework (structured specs and prompt engineering), enabling the team to seamlessly parallelize complex, multi-file changes with context-aware agents, strictly aligned with our architectural standards.

NextJS

Typescript

PostgreSQL

Drizzle ORM

Shadcn/ui

Tailwind CSS

Docker

Agentic Workflows

Fullstack Web Developer, ABAP Jr. Developer

Osh-Pro

Feb. 2024 – Jan. 2025

[Remote], Argentina

- Maintained and developed new features for Vista Energy's "MACRO" project, adapting my workflow with emerging LLM tools to rapidly onboard, reverse-engineer, and maintain the production-critical, undocumented codebase.
- Completed ABAP developer training.

NextJS

Typescript

Docker

ABAP

Frontend Web Developer

Quretec

Oct. 2020 – Sept. 2021

Tartu, Estonia

- Spearheaded the development of responsive, large-scale features for the "Muis 2" project, managing the lifecycle from early-stage design through to user testing.
- Engineered core routing, dynamic tables, forms, and global state management utilizing a highly scalable, library-based architecture.

ReactJS

Typescript

Redux

MaterialUI

Git

CI/CD

Jr Developer (ReactJS-Flutter), Product Manager Assistant

Reach-U

Mar. 2020 – Aug. 2020

Tartu, Estonia

- Maintained legacy systems and developed new features for the Tai+ project, optimizing code reliability and application performance.
